About Me

I'm an engineer, with over 15 years of mobile software production experience; 7 years in Javascript, 12 years in QA and 3 years in UI/UX Design.

I can design, engineer, and test new products.

In total, I've submitted over 30 apps to the iOS App Store and designed over 150 playable ads.

Create a collaborative memory book

Collect letters and photos from friends, family and coworkers. Perfect for celebrating retirements, birthdays or other occasions during Covid-19.

[Get started](#)

Newlywords

Engineering new features like the memory book project dashboard, where project owners can view and edit pages submitted from their contributors, and view information about their book.

Engineering new memory book content types like the questionnaire, where project owners create a questionnaire for their contributors to answer for their memory book. This helps project owners work with contributors that need some help sharing, or providing them with a consistent theme for their book, like birthdays, retirements, or weddings.

Building responsive pages, in HTML CSS, JS, React and Ruby, implementing front-end best practices, to be visited by hundreds of users per day.

Developing a design guide with classes and partials, from the product design system, to build stylesheets which implements reusable classes and styles

Implementing Agile methodologies for the team by timeline task planning, with the Trello plugin Planway, by scoping features to hit deadlines, and coordinating phases of testing from PR QA & Staging QA & Deployment.

Documenting our user feedback sessions where they provide feature requests, and we demo upcoming features, while capturing their feedback to tailor the features directly to the needs of our users.

Collaborating with product team to improve accessibility for customers, reviewing designs with our team before engineering begins, and suggesting improvements.

Mentoring a junior designer by providing design advice to help him utilize Figma features more robustly, and to think about user experience from our user's perspective, following a contextual flow of page elements.

Hawaii United Okinawa Association

Celebrating 120 years of Uchinanchu in Hawaii.

[LEARN MORE](#)

The Hawaii United Okinawa Association (HUOA) is a non-profit organization serving to promote, perpetuate, and preserve the Okinawan culture here in Hawaii.

Hawaii United Okinawa Association

Rebuilding original static site to be in the JAMstack, improving speed, page weight, and security of the older version of the client's website. Built with: React, React-Redux, Hooks, with a Wordpress backend and mobile support.

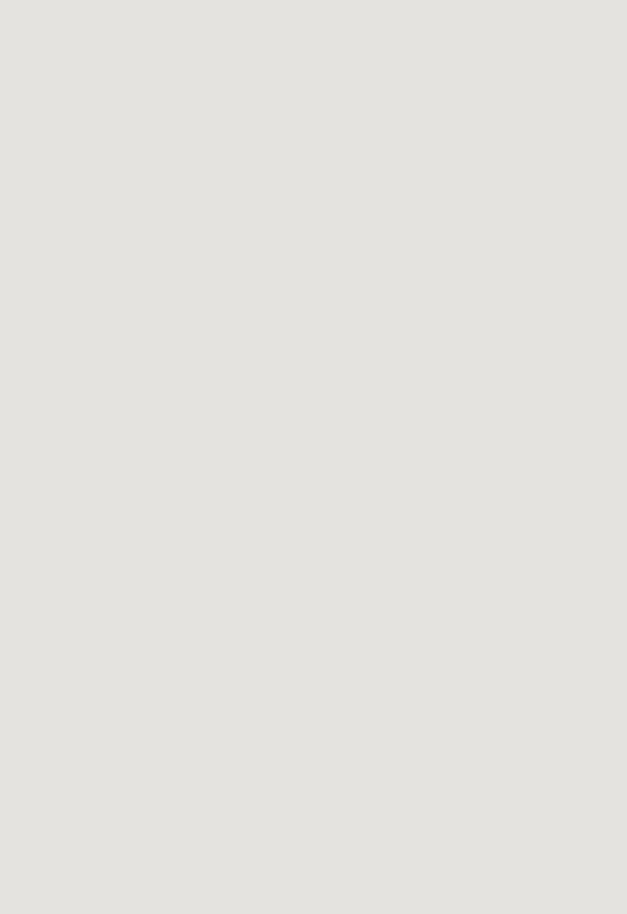

Contributing to component library, creating dynamic components rendering images and content served up by the WordPress API.

Engineering the reusable React Container components to control all layouts (Web, Tablet, Mobile) in CSS Grid and Sass, along with reusable Card components that are used site-wide.

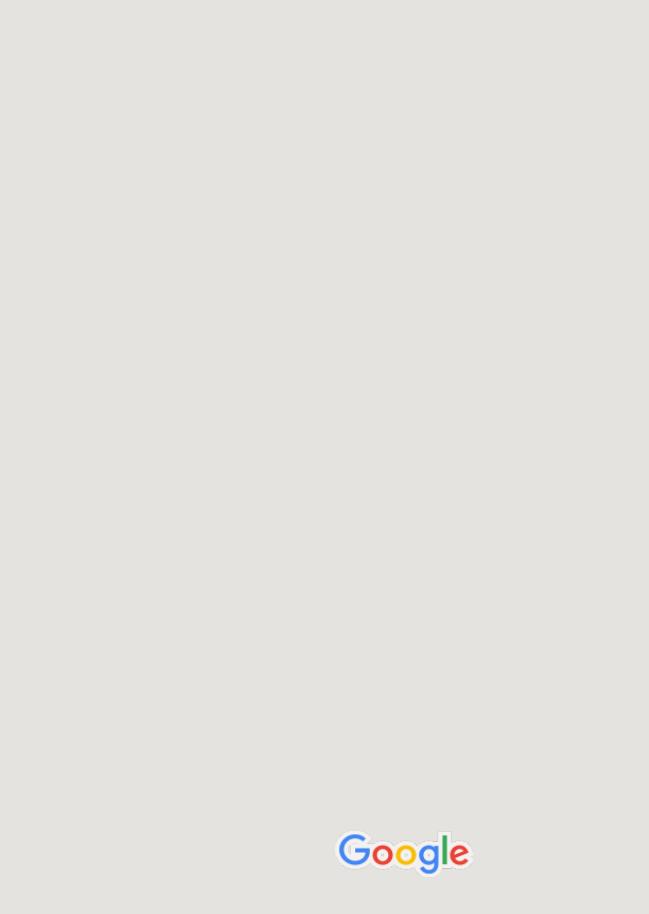

Onboarded new engineers by writing [onboarding documentation](#) in markdown and including it in the repo.

Added Docker to the project to keep all of our dev environments in sync with the latest dependencies.

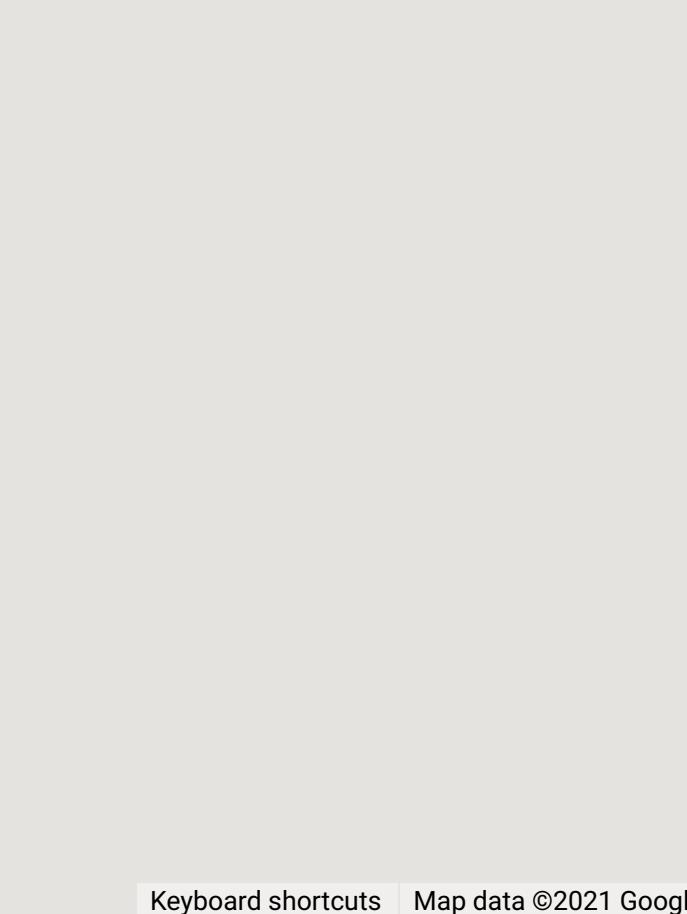

UI/UX Storyboards

Disney Frozen Adventures

Harry Potter: Hogwarts Mystery

Candy Crush Soda Saga

Recent Projects

This site uses the Rick and Morty API to render a database of characters, locations and episodes.

Mobile Block Crushing Game built with JS/JQuery/HTML5, with only CSS assets. Styled after Candy Crush.

Adopt pets in an Instagram-style image feed, utilizing the Petfinder API, Bootstrap, Django, SQL & Python.

A productivity app with geolocation for todo lists. Built with Google OAuth / Maps / Places API, NodeJS & MongoDB.

Designed playable ads for several of their IP including: Merge Dragons, Game of Thrones Slots Casino, Words With Friends 2

Tested & Published Unity Game War Commander Mobile for iOS & Android.

Tested & Published Chartboost SDKs for iOS, Android and Unity.

Worked on Cooking Craze and Gummy Drop playable ads.
